USING SARIS TO CAPTURE RAINWATER

Materials Needed:

- **Clothing from sari**
- **Bucket**

STEPS:

- 1. Hang up a sari between two trees or tie the ends on a clothing line so it hangs horizontally
- 2. Place a bucket or anything to collect water under the middle
- 3. Wait until the rainwater has stopped to collect the water
- 4. If you want further filtration, you can boil this water after has been collected.
